-Adaptability

-Communication and teamwork

CERTIFICATION

Responsive web design - free code camp

Java Training - Besant Technologies

Basic of Java Programming – udemy

LANGUAGE KNOWN

-Tamil

-English

PROFILE SUMMARY

A highly motivated Software Developer with expertise in Java, HTML, CSS, and SQL, seeking a full-time role to leverage my skills in developing scalable and efficient applications. Passionate about problem-solving, optimizing code, and contributing to innovative software solutions.

PROJECT

PROJECT-1

Proactive Defensive Strategy against Ransomware Threats using RanGAN and Hash Conceal

Technologies:- Html, Css, Bootstrap, Python, Mysql

Ransomware is malware that locks data or devices, demanding payment to restore access. The proposed system uses RanGAN for early detection and Hash Conceal for data protection. It employs advanced learning techniques and a caching strategy to prevent ransomware attacks in real-time.

PROJECT-2

Tourism Management System

Technologies:- Html, Css, Javascript, Mysql

The Tourism Management System is a user-friendly platform that simplifies travel for tourists and service providers. It enables tourists to explore destinations, compare packages, and book seamlessly while helping agencies manage inquiries, bookings, and payments efficiently.
