Aspiring Software Development Engineer with expertise in full-stack development using React.js, Node.js, and MongoDB. Built scalable web applications and optimized RESTful APIs, achieving top ranks in competitive programming. Passionate about solving complex problems and contributing to innovative tech solutions.

Education

Jabalpur Engineering College **November 2022 – June 2026**

Bachelor of Engineering in Information Technology *CGPA 7.0/10*

Projects

Full Stack Blogging Web App [GitHub] | *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack blogging application allowing users to create, edit, delete, and view blog posts with image support.
- Implemented secure JWT-based authentication to manage user sessions and protect routes.
- Designed a clean, responsive UI for seamless browsing and content interaction across devices.
- Developed RESTful APIs and optimized MongoDB queries for efficient blog and user data management.

Travel Listing Platform [GitHub] | *Node.js, Express.js, MongoDB*

- Built a full-stack travel accommodation platform allowing users to create, manage, and explore listings.
- Integrated user authentication, listing CRUD operations, and profile management to enhance platform usability and security.
- Optimized backend performance and database queries to ensure scalability and a smooth user experience.

Hospital Management System [GitHub] | *Java, OOPS*

- Designed and developed a Java-based Hospital Management System focusing on modular and object-oriented architecture.
- Implemented core features including patient registration, appointment scheduling, billing, and record handling.
- Applied OOP concepts like inheritance, encapsulation, and abstraction to ensure scalable and maintainable code.
- Created a user-friendly console-based interface for smooth interaction and hospital workflow simulation.

Technical Skills

Programming Languages: Java, C, JavaScript, SQL

Technologies/Frameworks: React.js, Node.js, Express.js, MongoDB, RESTful APIs, Tailwind CSS

Developer Tools: VS Code, Git, GitHub, IntelliJ IDEA, Figma, Photoshop

Technical Subjects: Data Structure & Algorithm (DSA), Database Management System (DBMS), Operating System (OS), Computer Network (CN), Computer Organization & Architecture (COA), Object-Oriented Programming System (OOPS), Software Engineering (SE)

Achievement

- Selected as a core member of Google Developer Student Clubs (GDSC), JEC, collaborating on open-source and tech events.
- Head of PR, E-Cell JEC; led Campus Tycoon 1.0 outreach and execution with 80+ participants.
- Maintained a 50+ day coding streak, solving daily DSA problems to sharpen skills and follow best practices.
- Secured a top-6 rank in the Prahar Coding Competition among 50+ teams through teamwork and optimized algorithms.
