KANDE VAMSHI KRISHNA

Hyderabad, Telangana, India | +91-9381832010 | mail | LinkedIn

Summary

Aspiring Software Engineer with strong foundations in computer science, data structures, and algorithms. Experienced in building real-world software projects using Java, Python, and C++, with a focus on problem-solving, scalability, and efficiency. Completed multiple internships and certifications in AI, cloud, and software engineering, while delivering impactful technical solutions through teamwork and innovation. Seeking to contribute to Microsoft's Software Engineer Apprenticeship by applying technical expertise, analytical skills, and a passion for building solutions that empower people and organizations.

Skills

Programming & Development: Java, Python, C++, SQL, HTML5, Git, GitHub
Computer Science Fundamentals: Data Structures, Algorithms, Operating Systems, DBMS
Tools & Frameworks: Pandas, NumPy, Scikit-learn, MS Excel
Core Competencies: Problem-Solving, Debugging, Team Collaboration, Code Optimization
Certifications: Microsoft Azure AI Fundamentals, DSA (iamneo), Deloitte Tech Job Simulation

Experience

Infosys Springboard Virtual Internship 6.0 | Software Engineering Intern | Jul 2025 – Present
- Built and tested 3+ ML/AI models for predictive analytics, achieving 15% faster evaluation time.
- Designed, debugged, and optimized code with a 20% reduction in runtime errors.
- Collaborated in a 6-member team, contributing to project planning, testing, and final reports.

Google Student Ambassador | Technical Coordinator | Jul 2025 – Present
- Organized 5+ technical workshops training 100+ students on cloud tools and software development.
- Delivered sessions on Python automation & version control (Git/GitHub), increasing adoption by 30%.
- Coordinated with peers to boost student engagement by 25% through coding challenges.

Projects

Smart Logistics Optimization System | Team Lead | Jan 2025 – Apr 2025
- Developed a logistics optimization tool using Python & Pandas, processing 10,000+ records.
- Improved delivery efficiency by 15% with optimized route planning and data analysis.
- Implemented clean documentation, risk analysis, and testing procedures.

AI Chatbot for Health Symptom Checker | Team Project | Feb 2025 – Mar 2025 -
Built an AI-powered chatbot to handle 500+ unique health queries during testing.
- Integrated natural language processing to improve diagnostic accuracy by 30%.
- Collaborated with developers/testers to streamline debugging and improve system reliability.

Awards & Certifications

- Microsoft Certified: Azure AI Fundamentals (Jul 2025)
- Deloitte Australia – Technology Job Simulation (Forage) (Jul 2025)
- Data Structures & Algorithms Certification – iamneo (Dec 2024)

Education

Lovely Professional University (LPU) | B.Tech in Computer Science Engineering | 2023 – Present
CGPA: 8.2 / 10 | Coursework: Data Structures, DBMS, OS, Machine Learning
Sri Chaitanya Junior Kalasala, Hyderabad | Class XII | 2021 – 2023
Percentage: 96%
