PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student with expertise in full-stack development using Java, Spring Boot microservices, and modern web technologies. Demonstrated experience in building scalable applications with React.js, MongoDB, and cloud technologies. Strong foundation in data structures, algorithms, and DevOps practices with a passion for creating efficient, user-centric solutions.

EDUCATION

Bachelor of Technology in Computer Science Engineering
School of Studies of Engineering and Technology
Guru Ghasidas Vishwavidyalaya, Bilaspur, Chhattisgarh
Expected Graduation: 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

---

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C, Python (developing proficiency)

Web Technologies: React.js, Spring Boot, RESTful APIs, JWT Authentication

Databases: MongoDB (NoSQL), Redis (Caching)

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Git, GitHub

Operating Systems: Linux, Windows

Core Concepts: Microservices Architecture, Object-Oriented Programming, Data Structures & Algorithms, Cloud Computing

---

PROJECTS

Full-Stack Journal Management Application

Java, Spring Boot, React.js, MongoDB, Redis, JWT

- Developed a secure web application enabling users to create, manage, and organize personal journals with role-based access control
- Implemented JWT-based authentication and authorization system ensuring data security and user privacy
- Built RESTful APIs using Spring Boot microservices architecture for comprehensive journal operations (CRUD functionality)
- Integrated Redis caching to optimize data retrieval and session management, improving application performance by 30%
- Designed responsive React.js frontend providing an intuitive user experience across devices
- Created an administrative dashboard with complete oversight of user entries and system management

Interactive Quiz Management System

Java, Spring Boot, React.js, MongoDB, JWT

- Architected and developed a comprehensive quiz platform supporting multiple question types and real-time score tracking

- Implemented secure user authentication using JWT tokens with role-based access for quiz creation and participation
- Designed scalable MongoDB database schema for efficient storage of questions, user responses, and performance analytics
- Built a dynamic React.js interface with an interactive quiz-taking experience and instant result display
- Developed admin panel for quiz creation, question management, and user performance monitoring
- Utilized microservices architecture ensuring modularity and easy maintenance

---

EXTRACURRICULAR ACTIVITIES

Google Developer Student Clubs (GDSC) - Member
Competitive Programming Domain
