PROFILE

Highly motivated Data Science and Analytics enthusiast with strong foundational knowledge in Python, Machine Learning Actively seeking internship opportunities to apply my skills in real-world business problems and grow as a data-driven problem solver.

WORK EXPERIENCE

Data Science (Self-Driven projects)

- Developed a Heart Disease Prediction Web App using Streamlit and multiple ML models (Logistic Regression, Decision Tree, Random Forest)
- Designed an intuitive UI for real-time predictions; deployed locally with interactive inputs
- Uploaded full project with model files and documentation on GitHub

Data Analyst - Sales Dashboard (Power BI Project)

- Created an interactive Sales Analysis Dashboard using Power BI to visualize KPIs like Total Sales, Profit Margin %, Total Orders
- Integrated multiple charts (bar, pie, cards) and slicers to filter by region, category, and time
- Uploaded to GitHub with structured repo, CSV file, and screenshots

Machine Learning Developer - Insurance Cost Prediction

- Conducted complete EDA, data cleaning, and feature engineering on a health insurance dataset
- Applied Linear Regression to predict insurance charges based on multiple features
- Visualized key relationships using Seaborn and Matplotlib, published project on GitHub

ADDITIONAL SKILLS

- Streamlit App Development
- Git & GitHub (Version Control)
- Jupyter Notebook & Google Colab
- Basic Excel (Charts, Pivot Tables)
- Fast Learner & Self-Motivated
- Strong Problem-Solving Skills
- Team Collaboration & Communication
