Education

Shri Ramswaroop Memorial College, Lucknow **Oct2022–Jun2026**

Bachelor of Technology ,Computer Science Engineering

Experience

IBM **Sep2023–Oct2023**

Campus Internship

- Developed a chatbot using Amazon Lex, enabling automated and natural language-based user interactions.
- Integrated AWS Lambda to process user inputs, ensuring an efficient and scalable backend for chatbot functionality.
- Designed a fully responsive webpage using Bootstrap for seamless adaptability across different screen sizes.
- Leveraged Bootstrap's grid system and components to create a structured, mobile-friendly layout.

Projects

Z-phisher learning project|*CyberSecurity* **Sep2024**

- Leveraged Zphisher in Kali Linux to create realistic phishing pages for cybersecurity testing.
- Streamlined the phishing process using pre-configured templates and easy deployment via Ngrok.
- Investigated social engineering tactics to understand how attackers manipulate user trust online.
- Acquired practical experience in network security and the significance of ethical hacking practices.

Job Tracker App|*frontend* **Jan2025**

- Developed a responsive single-page application using React.js to manage job applications.
- Users can add, edit, and delete job entries including job title, company name, and application status.
- Integrated **localStorage** to persist user data even after page refresh or browser close.
- Used React useState() and useEffect() for state management and data persistence.
- Created clean, beginner-friendly UI with proper form validation and conditional rendering.
- Version controlled with Git and hosted source code on GitHub

Technical Skills

Programming/Misc : HTML, SQL, CSS, JAVA, JS, REACTjs

Certificates

- Html and Css
- IBM Cloud essentials
- Python for DS
- Big data
- Cybersecurity Essential

Relevant Course work

Machine Learning	Data Structures	Operating Systems	Web Development
Data Compression	DBMS	Cyber security	Sensor and Instrumentation
