Full-stack developer skilled in MERN stack, JWT, and RESTful API design. Proven ability to build AI-enabled web apps with real-time functionality, robust security, and scalable solutions driving seamless user experiences.

Technical Skills

Languages: JavaScript, TypeScript, Python, C/C++, HTML/CSS
Frontend Technologies: React Js, Next.Js, Redux Toolkit, Tailwind Css
Backend Technologies: NodeJs, ExpressJs, Passport Js, Jwt, Next.Js
Database: MongoDB, PostgreSql, MySql, Prisma, Neondb
Developer Tools: Git, VS Code, Visual Studio, Postman
Fundamentals: DBMS, CN, OOPS, DSA

Education

Aligarh College Of Engineering And Technology Aligarh, UP
Bachelor of Technology in Computer Science And Engineering - 8.55 GPA *Sep. 2022 - July 2026*
Dharam Samaj Bal Mandir, Aligarh Aligarh, UP
Intermediate PCM and High School *Aug. 2018 - June 2022*

Projects

MindEase *MERN Stack, Gemini API, JWT* [Demo] - [Repo]

- Developed a mental health platform with an AI chat assistant for real-time support and a quiz for personalized assessments. Integrated free bootcamps for underprivileged users and a secure donation system for funding treatments. Emphasized accessibility, empathetic design, and strict user data privacy.

Campus Connect *MERN Stack, Gemini API, Multer, Socket.io, Resend, JWT* [Demo] - [Repo]

- Secured 3rd place in a college hackathon by leading the development of an innovative MERN stack campus dashboard in a 4-member team.
- Implemented real-time chat, classroom management with MCQ tests, AI-enhanced event/notice boards, placement portal, blogging platform, and admin dashboard.
- Led development of core modules including classroom flow, placement workflows, and MCQ test logic for seamless user experience.

AirJect (Airport Management System) – *Gemini API, typescript , Next.js , MongoDB* [Demo] - [Repo]

- Built a full-stack role-based system to manage airport operations including flight/staff management via admin dashboard.
- Enabled passengers to book tickets and download PDFs securely, Implemented secure JWT cookie-based authentication for user sessions.
- Designed a responsive UI using Tailwind CSS for optimal experience, Added staff task assignment and dynamic admin-side controls.

Ai-TripPlanner *Next.js, Gemini API, JWT , MongoDB* [Demo] - [Repo]

- Built an intelligent travel planner that creates personalized itineraries based on user budget, interests, and trip duration.
- Integrated real-time data for destinations, accommodations, and transport to ensure up-to-date travel suggestions. Implemented secure JWT-based authentication and ordering system.
- Designed a mobile-first, responsive UI with seamless UX , Ensured real-time handling for reliability and smooth interaction across all devices.

Achievements

ACET Innovate x Hackathon: Secured 3rd Rank out of 15+ teams by presenting the Campus Connect project — an all-in-one college web app. Demonstrated strong teamwork and innovative problem-solving.
AuraFlix Hackathon: Received Certificate of Excellence as one of the 4 teams selected from over 400. Showcased advanced coding and UI/UX design skills.
GSSoC Ext 2024: Achieved badges and participation certificate for contributing to GirlScript Summer of Code highlighting collaboration in open-source projects.
Javascript/SQL HackerRank Certificate : Got a HackerRank Javacript intermediate ,Advanced and Basic Certificate for the excellence Performance.
